

Add-Ons Terms & Conditions

1. Definition: Add-ons

An add-on is an add-on that a trader can purchase optionally for a challenge. The add-on allows you to improve the challenge according to its description.

2. Available add-ons, descriptions of operation

There are currently three types of add-ons available for challenges. They are:

- **150% refund** - only possible on challenges that have a refund. These are all two-stage challenges, namely the programmes: Black Pepper, Sweet Pepper, and Mini Pepper. This option applies after passing the challenge. The simulation funded account is credited with not 100% but 150% of the challenge fee as a refund using this add-ons.
- **8 day withdrawal** - in standard programmes (excluding Black Pepper) the first withdrawal of the reward is possible every 14 days. A trader after purchasing the faster withdrawal add-on has the ability to EVERY TIME send a request to withdraw a reward from a simulated funded account every eight days. As previously mentioned, this add-on only works on accounts that are funded simulated accounts. It is not possible to apply this add-on to challenge accounts.
- **4% more capital slip** - applies to challenge accounts (all challenges available in SpiceProp) and the Jalapeno account (each stage). It then adds 4% to the total (not daily) capital drawdown. It is intended to allow traders in the challenge stage to make moves that are more aggressive.

3. Summary of how the add-ons work:

Programme / Add-on	4% DD	Fast withdrawal (8 days)	150% refund	When is working?
 Mini pepper	x	x	x	4% DD - on challenge (only 1 and 2 phase), Fast Withdrawal - simulated funded, 150% - if you pass
 Sweet pepper	x	x	x	4% DD - on challenge (only 1 and 2 phase), Fast Withdrawal - simulated funded, 150% - if you pass
 Chilli pepper	x	x		4% DD - on challenge (only phase 1), Fast Withdrawal - simulated funded
 Black pepper	x		x	4% DD - on challenge (only 1 and 2 phase), 150% - if you pass
 Jalapeno	x	x		4% DD - only on phase 1, Fast Withdrawal - simulated funded (first scaling)

4. A 150% refund is not available on the Chilli Pepper programme.

In this programme we do not allow you to get a refund for passing the challenge. Therefore, the add-on is not available.

5. In the Black Pepper option, payouts are processed faster under the Hot Seat programme.

Reward withdrawals can be withdrawn after 7 days. Therefore, we do not offer the "8 days payout" add-on as it is disadvantageous in this case. The quick withdrawal add-on is not available here.

6. Jalapeno is the only programme where the 4% increased total risk works all the time.

The 150% refund option is not available, as there is no fee refund here. Jalapeno accounts are called 'immediate funded' accounts, which in practice means no challenge and going straight to a simulated funded account.

7. Challenge refunds vs. add-ons

In accordance with our refund policy, a paid account with purchased add-ons can be refunded up to 14 days when there are no trades in the account and it has not been used for simulated trading.
